

MAC/230 Semi-Automatic Vacuum Round Can Seaming Machine

Pneumatic-mechanic drive machine is designed to evacuate, gas and seam cans at a single work station. Place the filled can, with the lid on it, onto the bottom seaming chuck. After pressing the electrical foot pedal, the operations will be performed automatically.

- High precision, adjustable vacuum and gas pressure microprocessors
- PLC controls are SIEMENS, all pneumatic equipment is FESTO, vacuum pump is German BUSCH
- Machine does not need special "Vacuum Can Lids" and can seam every type of lids perfectly
- Suitable for food and pharmaceutical production (such as milk powder, coffee, dried fruits, etc.)
- Low investment, low operating costs, easy and safe operation

Technical Data:

Capacity (Without Vacuum)	20 - 25 cans/minute
Capacity (With Vacuum)	12 - 15 cans/minute
Can Diameter	52 - 110 mm
Air Consumption	2 lt/operation
Residual Oxygen Content	Less than %0,5*
Operation Air Pressure	5 Bar
Total Power	4 kW
Machine Weight	550 Kg
